

ASSET MANAGEMENT IN BREWERIES & DISTILLERIES

ENASYS RETURN ON INVESTMENT

CAPTURE · TRACK · MANAGE

FINANCIAL

Inventories are 90% quicker

Healthy payback just on speed alone

2.2x more assets found

Match orphaned and missing items

Missing assets reduced to 1%

Reduced shrinkage saves cost of replacement

OPERATIONAL

Less inventory exceptions to sort

Real time recognition of missing assets

Increased regulatory compliance

Reports generated to meet requirements

Enhanced asset visibility

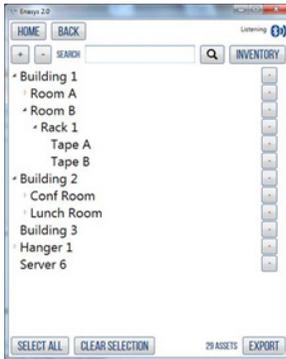

EZ read accurate listing

More time for creating value

Less searching

INCREASED INVENTORY COUNTS,
INCREASED RETURN

RETURN ON INVESTMENT

Number of Inventories Per Year
4 times

Payback
1 Year

*Assumes 14k assets. For 3k assets 1yr ROI if 1taken 12 times

Plus:

more assets found
fewer missing assets
decreased shrinkage
increased compliance and visibility

CASE STUDY

Misplaced and unreturned kegs are a major business issue for local breweries and distilleries. Once sent to local distributors, brewing facilities expect a return window between 3-6 months.

Often, these kegs are not returned in a timely manner, if at all. Follow-up and contact points on the part of the brewery are required. After 9 months, an unreturned stainless steel keg, valued at approximately \$100, is marked as a loss.

Tracking these kegs using traditional methods is problematical: As the kegs are barcoded, tracking them is very labor-intensive. The barcode can even become unreadable after travel, cleaning, and usage. Tracking these barcodes with spread-sheeting takes a significant amount of time and money and the accuracy can be questionable.

Save time, money and improve accuracy with EDP's durable and reliable EnaSys tracking system. With EDP's long lasting radio frequency tags on kegs and other outbound brewery materials, scanning can be done quickly and easily upon departure, pick up and arrival with door and mobile portals. EDP scanners make quick work of the average pallet of 20 or more kegs. Generally, inventory takes 90% less time with the EnaSys system than traditional methods.

In addition, the EnaSys system automatically generate a number of reports, including details on which kegs have been outside the facility for 90 days, or any set number desired, prompting a return reminder to the distributor or a bill for lost property.

EDP provides comprehensive asset-tracking solutions for ANY business. Cheers!
